

Disaster Preparedness in the Pacific Northwest

Are you, your family and your employer prepared for a disaster?

The Pacific Northwest is a beautiful place to live and work but it is also a target for **Earthquake, Flood, Volcanic Eruption, Ice, Snow, Wind Storms and Terrorist Attack**. Are you ready? Is your home ready? What would you do if **the BIG one** hit while you were at work? Are you prepared to spend 3 days with only the supplies you have on hand? Does your family know what to do?

In this class you will learn more about the threats that can directly effect you and your family and how you can better prepare for such an emergency.

We will cover **local risks, community preparedness, employer preparedness, personal preparedness and actions for survival during a disaster.**

This 2 hour class is taught by George Epperly, a professional Firefighter/Paramedic with 30 years experience and follows information provided by the Department of Emergency Management and the Federal Emergency Management Administration.
